Companion Material for "Systematic Literature Review on Cross-Project Predictive Modeling for Software Engineering tasks"

Ayashkant Mishra[1], Santosh Singh Rathore[1,]

[a]*Department of Computer Science and Engineering, ABV-IIITM Gwalior, India*

This document provides the supporting material referenced in the main paper. Section 1 reports the iterative search strings used during the empirical refinement of the retrieval query (iterations S1–S9), documenting how the search query evolved across successive rounds. Section 2 lists the primary studies selected for the review, together with their reference keys, titles, and authors.

1. Iterative Search Strings Used During Refinement

Table 1: Iterative search strings used during empirical refinement of the retrieval query.

ID	**Search string**
S1	("cross project defect prediction" OR "cross company defect prediction" OR "cross project fault prediction") AND ("transfer learning" OR "domain adaptation" OR "representation learning" OR "latent space learning" OR "feature alignment" OR "domain invariant representation" OR "distribution shift" OR "deep transfer" OR "feature distribution alignment") AND ("software engineering" OR "software quality" OR "software analytics" OR "software maintenance" OR "software evolution" OR "mining software repository")
S2	("cross project defect prediction" OR "cross company defect prediction" OR "cross project fault prediction") AND ("transfer learning" OR "domain adaptation" OR "deep transfer") AND ("software engineering" OR "software quality" OR "software analytics")
S3	("cross project defect prediction" OR "cross company defect prediction" OR "cross project fault prediction") AND ("transfer learning" OR "domain adaptation" OR "deep transfer" OR "representation learning") AND ("software engineering" OR "software analytics" OR "software maintenance")
S4	("cross project defect prediction" OR "cross company defect prediction" OR "cross project fault prediction") AND ("transfer learning" OR "domain adaptation" OR "deep transfer" OR "representation learning" OR "feature distribution alignment") AND ("software engineering" OR "software analytics" OR "mining software repository")

2. Selected Primary Studies

This section lists the primary studies selected for the review. The reference numbers correspond to the bibliography of this document.

Table 2: Selected primary studies included in the review.

S.No.	Ref.	Paper title	Authors
1	[1]	Heterogeneous cross-company defect prediction by unified metric representation and CCA-based transfer learning	Xiaoyuan Jing, Fei Wu, Xiwei Dong, Fumin Qi, Baowen Xu
2	[2]	Cross-Project Software Defect Prediction Using Feature-Based Transfer Learning	He Qing, Li Biwen, Shen Beijun, Yong Xia
3	[3]	Heterogeneous defect prediction	Jaechang Nam, Sunghun Kim
4	[4]	Negative samples reduction in cross-company software defects prediction	Lin Chen, Bin Fang, Zhaowei Shang, Yuanyan Tang
5	[5]	Improving Cross-Project Defect Prediction Methods with Data Simplification	Sousuke Amasaki, Kazuya Kawata, Tomoyuki Yokogawa

S.No.	Ref.	Paper title	Authors
6	[6]	A Hybrid Instance Selection Using Nearest-Neighbor for Cross-Project Defect Prediction	Duksan Ryu, Jong-In Jang, Jongmoon Baik
7	[7]	A transfer cost-sensitive boosting approach for cross-project defect prediction	Duksan Ryu, Jong-In Jang, Jongmoon Baik
8	[8]	Studying just-in-time defect prediction using cross-project models	Yasutaka Kamei, Takafumi Fukushima, Shane McIntosh, Kazuhiro Yamashita, Naoyasu Ubayashi, Ahmed E. Hassan
9	[9]	Transfer learning in effort estimation	Ekrem Kocaguneli, Tim Menzies, Emilia Mendes
10	[10]	Effective multi-objective naïve Bayes learning for cross-project defect prediction	Duksan Ryu, Jongmoon Baik
11	[11]	Automatically learning semantic features for defect prediction	Song Wang, Taiyue Liu, Lin Tan
12	[12]	Defect Prediction on Unlabeled Datasets by Using Unsupervised Clustering	Jun Yang, Hongbing Qian
13	[13]	HYDRA: Massively Compositional Model for Cross-Project Defect Prediction	Xin Xia, David Lo, Sinno Jialin Pan, Nachiappan Nagappan, Xinyu Wang
14	[14]	Value-cognitive boosting with a support vector machine for cross-project defect prediction	Duksan Ryu, Okjoo Choi, Jongmoon Baik
15	[15]	Transfer Learning for Cross-Project Change-Proneness Prediction in Object-Oriented Software Systems: A Feasibility Analysis	Lov Kumar, Ranjan Kumar Behera, Santanu Rath, Ashish Sureka
16	[16]	A feature matching and transfer approach for cross-company defect prediction	Qiao Yu, Shujuan Jiang, Yanmei Zhang
17	[17]	A Cluster Based Feature Selection Method for Cross-Project Software Defect Prediction	Chao Ni, Wang-Shu Liu, Xiang Chen, Qing Gu, Dao-Xu Chen, Qi-Guo Huang
18	[18]	An Improved SDA Based Defect Prediction Framework for Both Within-Project and Cross-Project Class-Imbalance Problems	Xiao-Yuan Jing, Fei Wu, Xiwei Dong, Baowen Xu
19	[19]	Global vs. local models for cross-project defect prediction: A replication study	Steffen Herbold, Alexander Trautsch, Jens Grabowski
20	[20]	A Comparative Study to Benchmark Cross-Project Defect Prediction Approaches	Steffen Herbold, Alexander Trautsch, Jens Grabowski
21	[21]	Cross project defect prediction using hybrid search based algorithms	Wasiur Rhmann

S.No.	Ref.	Paper title	Authors
22	[22]	Cross-Project Issue Classification Based on Ensemble Modeling in a Social Coding World	Yarong Zeng, Yue Yu, Qiang Fan, Xunhui Zhang, Tao Wang, Gang Yin, Huaimin Wang
23	[23]	An effective fault prediction model developed using an extreme learning machine with various kernel methods	Lov Kumar, Anand Tirkey, Santanu-Ku. Rath
24	[24]	An Overview of Transfer Learning Focused on Asymmetric Heterogeneous Approaches	M Friedjungová, M Jiřina
25	[25]	Comparing Hyperparameter Optimization in Cross- and Within-Project Defect Prediction: A Case Study	Muhammed Maruf Öztürk
26	[26]	Cost-sensitive transfer kernel canonical correlation analysis for heterogeneous defect prediction	Zhiqiang Li, Xiao-Yuan Jing, Fei Wu, Xiaoke Zhu, Baowen Xu, Shi Ying
27	[27]	Cross-company defect prediction via semi-supervised clustering-based data filtering and MSTrA-based transfer learning	Xiao Yu, Man Wu, Yiheng Jian, Kwabena Ebo Bennin, Mandi Fu, Chuanxiang Ma
28	[28]	Defect prediction model of static code features for cross-company and cross-project software	Satwinder Singh, Rozy Singla
29	[29]	Cross-Project Transfer Representation Learning for Vulnerable Function Discovery	Guanjun Lin, Jun Zhang, Wei Luo, Lei Pan, Yang Xiang, Olivier De Vel, Paul Montague
30	[30]	Neural Network-based Detection of Self-Admitted Technical Debt: From Performance to Explainability	Xiaoxue Ren, Zhenchang Xing, Xin Xia, David Lo, Xinyu Wang, John Grundy
31	[31]	Applying Cross Project Defect Prediction Approaches to Cross-Company Effort Estimation	Sousuke Amasaki, Tomoyuki Yokogawa, Hirohisa Aman
32	[32]	On cost-effective software defect prediction: Classification or ranking?	Xuan Huo, Ming Li
33	[33]	A Cost-Sensitive Shared Hidden Layer Autoencoder for Cross-Project Defect Prediction	Juanjuan Li, Xiao-Yuan Jing, Fei Wu, Ying Sun, Yongguang Yang
34	[34]	DP-Share: Privacy-Preserving Software Defect Prediction Model Sharing Through Differential Privacy	Xiang Chen, Dun Zhang, Zhan-Qi Cui, Qing Gu, Xiao-Lin Ju
35	[35]	Cross Project Defect Prediction via Balanced Distribution Adaptation Based Transfer Learning	Zhou Xu, Shuai Pang, Tao Zhang, Xia-Pu Luo, Jin Liu, Yu-Tian Tang, Xiao Yu, Lei Xue
36	[36]	Heterogeneous defect prediction with two-stage ensemble learning	Zhiqiang Li, Xiao-Yuan Jing, Xiaoke Zhu, Hongyu Zhang, Baowen Xu, Shi Ying

S.No.	Ref.	Paper title	Authors
37	[37]	An exploratory study on applicability of cross project defect prediction approaches to cross-company effort estimation	Sousuke Amasaki, Hirohisa Aman, Tomoyuki Yokogawa
38	[38]	Moving from Cross-Project Defect Prediction to Heterogeneous Defect Prediction: A Partial Replication Study	Hadi Jahanshahi, Mucahit Cevik, Ayse Basar
39	[39]	Cross-Project Software Fault Prediction Using Data Leveraging Technique to Improve Software Quality	Bilal Khan, Danish Iqbal, Sher Badshah
40	[40]	Software visualization and deep transfer learning for effective software defect prediction	Jinyin Chen, Keke Hu, Yue Yu, Zhuangzhi Chen, Qi Xuan, Yi Liu, Vladimir Filkov
41	[41]	Understanding the automated parameter optimization on transfer learning for cross-project defect prediction: an empirical study	Ke Li, Zilin Xiang, Tao Chen, Shuo Wang, Kay Chen Tan
42	[42]	SLDeep: Statement-level software defect prediction using deep-learning model on static code features	Amirabbas Majd, Mojtaba Vahidi-Asl, Alireza Khalilian, Pooria Poorsarvi-Tehrani, Hassan Haghighi
43	[43]	An empirical study of ensemble techniques for software fault prediction	Santosh S. Rathore, Sandeep Kumar
44	[44]	An empirical study of factors affecting cross-project aging-related bug prediction with TLAP	Fangyun Qin, Xiaohui Wan, Beibei Yin
45	[45]	Cross-Project Software Defect Prediction Based on Feature Selection and Transfer Learning	Lei Tianwei, Xue Jingfeng, Han Weijie
46	[46]	Training Data Selection Using Ensemble Dataset Approach for Software Defect Prediction	Md Fahimuzzman Sohan, Md Alamgir Kabir, Mostafijur Rahman, S. M. Hasan Mahmud, Touhid Bhuiyan
47	[47]	BiLO-CPDP: bi-level programming for automated model discovery in cross-project defect prediction	Ke Li, Zilin Xiang, Tao Chen, Kay Chen Tan
48	[48]	Deep Transfer Bug Localization	Xuan Huo, Ferdian Thung, Ming Li, David Lo, Shu-Ting Shi
49	[49]	How Far Have We Progressed in Identifying Self-admitted Technical Debts? A Comprehensive Empirical Study	Zhaoqiang Guo, Shiran Liu, Jinping Liu, Yanhui Li, Lin Chen, Hongmin Lu, Yuming Zhou
50	[50]	Analysis and modeling conditional mutual dependency of metrics in software defect prediction using latent variables	Nima Shiri Harzevili, Sasan H. Alizadeh

S.No.	Ref.	Paper title	Authors
